## Environmental Health and Safety Policy Statement

2trg conducts all business activities in a manner that protects the natural environment and the health and safety of our employees, customers and the population in general.

At 2trg, environmental compliance is at the core of every product and service we offer and has been since the company was founded in 2003.

Our staff members are trained to ensure that our operations surpass all federal, state, and local rules and regulations.

- Our facilities are fully permitted by all appropriate government authorities to manage the materials we handle.
- We carry pollution liability insurance to ensure our operations protect our customers' long-term liability and the environment.
- We perform environmental audits of our downstream vendors to ensure they manage all materials in a responsible fashion and meet our stringent environmental protection standards.
- We have signed the Basil Action Network's Electronics Recycler's Pledge of True Stewardship ([www.ban.org](http://www.ban.org)). We continue to uphold these standards and aggressively search for new ways to surpass pledge requirements.

*2trg offers services that are designed to minimize waste and meet the most stringent environmental compliance standards.*
