## **Electronics Recycler Wins Award for Fast Growth**

2trg, an end-of-life computer and technology equipment recycler based in Cincinnati, OH, was announced the winner of the Cincinnati Business Courier's Fast 55 Award for the fastest growth in the revenue category of \$5.1 million to \$10 million during the Courier's Fast 55 event on June 9, 2011. 2trg experienced a 316% increase in growth between 2008 and 2010.

Chief Financial Officer Carol Weinstein thanked her business partner, Chief Client Advisor Stuart Shaffer and the 2trg staff for their hard work and dedication to the company during her acceptance speech. "2trg also thanks its customers for their business, their loyalty, and for their help educating others about properly recycling end-of-life technology equipment," Ms. Weinstein later said.

2trg increased the size of its workforce between 2008 and 2010 by over 1,300% and recently opened a third processing facility in Geneva, New York. One of only 5 WBEN certified Fast 55 finalists, 2trg attributes its growth to its processing capabilities which include the use of both high tech machinery and manual disassembly and allow 2trg to process 100% of all material received. 2trg recently installed a shredding and sortation system at its Cincinnati facility that will improve efficiency by shredding 4 tons of electronic waste per hour and sorting ferrous and non-ferrous metals.

The amount of electronic waste (e-waste) in the United States continues to grow due to the obsolescence of technology. The increasing amount of e-waste generated has led to a demand for recyclers resulting in exponential growth in the e-waste recycling industry. 2trg is unique in that it offers its customers secure data destruction services and operates under a Zero Landfill and Zero Export policy.

2trg is a Cincinnati, OH based company that provides end-of-life computer and technology equipment recycling and reuse, CRT de-manufacturing, secure data destruction, cabling, and technology deployment services to small businesses, schools and governments, Fortune 500
